

# An immersive educational experience in the heart of London

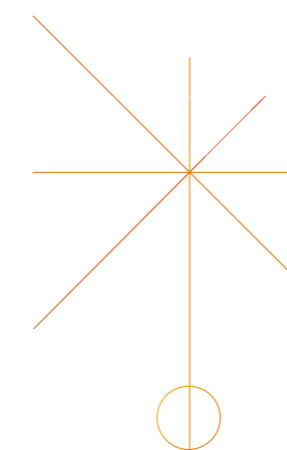

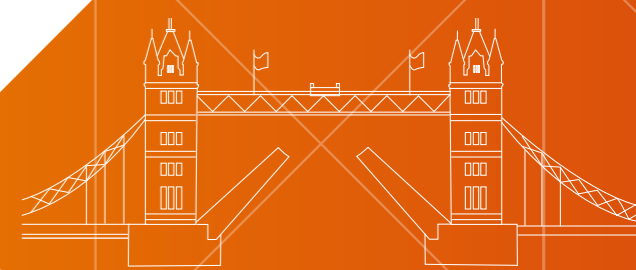

Our Academic Summer School 2025 offers an immersive educational experience in the heart of London, combining visionary academics with hands-on career pathways like Medicine, Engineering, Entrepreneurship, and Robotics.

In partnership with Academic Summer Camp and Tech Study UK, our unique summer school provides an extraordinary blend of academic and leisure activities, brimming with adventures both within London and beyond. On weekends, you'll have the chance to explore more of England, soaking in its charm during trips to Oxford, Windsor, Brighton, and Cambridge. Join us this summer for the perfect mix of fun, education, and adventure!

The summer programme benefits from 50 years of educational excellence and experience that has been developed at David Game College, which, since 1974, has helped over 10,000 students to secure places at top British Universities. David Game's partner Academic Summer Camps brings the experience as pioneers in offering quality academic summer courses in the UK and Canada since 2008.

## New for 2025 come as a family!

Our Adventurer and Explorer programmes are open to day students age 10 to 13, and parents can book English and Business English lessons with Kensington Academy of English located at David Game College as well.

# Course Features

## EXPERT TUTORS

At our Academic Summer School our courses are carefully designed to provide strong academic input delivered through interactive seminar-style classes tailored to suit the summer school environment. Our teachers are specialists in their subjects and chosen for their passion, dedication and expert knowledge. We want our students to be active, engaged and excited; to discuss, debate and question concepts whilst developing new ideas.

Our tutors are carefully selected to ensure they have specialist subject knowledge and experience of teaching international students. They are both engaging and supportive and will encourage students to develop independent and critical thinking, to explore new ideas and engage in debate and discussion. The tutors are subject specialist teachers, industry experts such as real entrepreneurs, and university students who are studying Engineering, Computing or Medicine so you can get an inside view of the demands of studying at a top UK university. We want to ensure students are provided with a supportive environment where they can develop self-confidence and leadership skills facilitated by teaching of the highest quality.

## SMALL CLASS SIZES

Small class sizes of between 12 students for our Career Pathway programmes to 15 in our Engager, Adventurer & Explorer classes to ensure that each and every student is given close personal support and attention so they can make the most of their class time at the summer school.

## CONTENT AND LANGUAGE INTEGRATED LEARNING (CLIL)

Central to the Academic Summer experience is the innovative methodology known as CLIL, which stands for 'Content and Language Integrated Learning.' This approach enriches our courses with a holistic and dynamic educational framework. CLIL seamlessly integrates the acquisition of language skills with the exploration of subject content.

### Content and Language Integrated Learning is based on the 4Cs:

- Content – enriching our curriculum knowledge
- Culture – raising awareness of our culture and the culture of others
- Cognition – thinking and learning skills
- Communication – sharing our ideas effectively with others

From interactive workshops, masterclasses, seminar classes to hands-on activities, we foster a profound connection between language and content. This innovative approach enhances critical thinking, encourages creativity, and prepares students to excel in both academic, real-life scenarios and prepares them for their future careers.

## MASTERCLASSES WITH GUEST SPEAKERS

Each week we will invite inspirational guest speakers from a range of different areas - politicians, academics, sportspeople, business leaders, journalists. They will provide insights into careers, leadership and their own success stories to give inspiration to our summer school students.

## END OF COURSE EVALUATION

Each student will receive a detailed report on their progress made during the programme, areas where they have excelled and areas for improvement. They will also go home with a certificate as well as the CPD accredited, Be a Leader qualification for the Career Pathway programmes.

## BE A LEADER

Integrated into the Career Pathways programme is the Be a Leader course. Be a Leader is a CPD accredited, bespoke course tailored to challenge you to explore what leadership means, how you can develop key leadership and team working skills, understand your strengths and interests better, and use this insight to reach for your future career. Built into your daily routine for the exploration of essential leadership skills such as communication, negotiation, change-management, influence and confidence.

These are introduced in morning assemblies and then developed through practical application with your teachers and camp counsellors. These skills are further explored in the leisure programme and you'll have the chance to Meet a Leader - accomplished individuals from diverse fields who share their personal journeys to success, inspiring your own dreams. Additionally, you'll have premium access to 'My Future Choices', a psychometrically designed aptitude and career guidance platform which will help you to explore your potential and career pathways, and you can continue exploring after you finish your summer course with us.

# Our Courses

## Adventurers & Explorers

10-13 years

Day Students Only

Designed for young learners age 10 to 13, this course is open to day students where theory meets practice in a dynamic exploration of all the subject areas.

We will help you prepare for your future studies, and at the same time improve your English language skills. You will explore a series of STEAM (Science, Technology, Engineering, Arts and Mathematics) and Social Studies (History, Politics, Business, Sociology and Geography) subjects. This course follows a CLIL approach allowing students to learn the subject and the English Language simultaneously.

Course Length	Two-weeks
Age	10-13 (class placement by age)
Minimum Level of English	B1 on the CEFR
Hours of Learning	25 per week
Max Class Size	15

### Adventurers & Explorers Course Start Dates

29 JUNE → 13 JULY

13 JULY → 27 JULY

27 JULY → 10 AUGUST

### FEES

£2,300 / Per two-week course as a day student (Age 10-13).

Day (Age 10+) fees include lunch and programme  
Monday to Friday 8.30-18.00

## Engagers

14-17 years

Day/Boarding Students

Engage deeper into A Level subject areas and immerse yourself in the realm of your chosen fields. That's right, you chose your subjects and we create your unique timetable. The subjects we are offering are:

- Applied Mathematics
- Art
- Debate and Public Speaking
- Essay Writing
- Media Studies
- Presentations and Interviews
- Psychology
- Social Studies
- Science
- Theory of Knowledge

You will study 4 subjects per week, but we ask you to choose a couple more, so we can make sure you are always in a class that interests YOU. In your lessons, you will:

- improve your study skills
- experience the practical nature of the subject
- explore a range of different media and materials
- enjoy using modern technology
- explore a variety of cultures
- explore subjects in the context of their locality
- work together to help one another understand challenging concepts and functions.

Course Length	2-4 weeks
Age	14-17
Minimum Level of English	B2 on the CEFR
Hours of Learning	30 per week
Max Class Size	15

### FEES

**£4,300 / Per two-week course for a standard room.**

**£4,500 / Per two-week course for an ensuite room.**

**£2,300 / Per two-week course as a day student (Age 14-17).**

Boarding (Age 14+) fees include tuition, accommodation, meals, insurance, airport transfers, trips and activities. Day (Age 10+) fees include lunch and programme Monday to Friday 8.30-18.00.

### Engagers Course Start Dates

29 JUNE → 13 JULY

13 JULY → 27 JULY

27 JULY → 10 AUGUST

# Career Pathway Programmes

## 15-17 years

### Day/Boarding Students

Our Career Pathway programmes are designed to give you practical insights into your future career.

Through experience, inspiring visits, workshops, lectures, and career guidance, we will help you develop essential life skills and tools for success. Career pathway programmes are available in the following; Academy Career Pathway Programmes are designed to provide students with practical insights into their future careers. All programmes include core academic subject tuition in small groups related to each professional field, immersive industry experiences, inspiring site visits and career guidance through Be a Leader to help students understand what is required to be successful in their chosen career. Each student will have the opportunity to build a personalised development plan to guide them on their pathway to success.

Each of the Career Pathways includes a culminating activity or final outcome, which could be a research project, a presentation, or the opportunity to pitch your ideas. These concluding activities are integral to the assessment of your final grades.

Career pathway programmes are available in the following;

Get Ready for Medicine

Get Ready for Engineering

Get Ready for Entrepreneurship

Get Ready for Robotics & Coding

# All Career Pathway Programmes include

- Full-board residential accommodation 14 nights
- 80 hours of learning over two weeks
- End of course outcome, whether this a group challenge or presenting your research project or business plan
- Be a Leader programme leading to CPD qualification as well as a CPD qualification for the Carrer pathway along with My Future Choice aptitude and Career test, report and reference from an industry expert.
- Lectures, industry visits and workshops
- 3 Full day excursions over two weeks
- 1 West End Musical / theatre trip
- Full afternoon and evening activity programme
- Travel Card

<b>Course Length</b>	<b>Two-weeks</b>

**£5,200 / Per two-week course for an ensuite room.**

**£3,000 / Per two-week course as a day student.**

Includes tuition, teaching materials, accommodation, meals, insurance, airport transfers and trips and activities. Day fees includes lunch and programme Monday to Friday 8.30 to 18.00.

## Career Pathway Programmes Start Dates

29 JUNE → 13 JULY

13 JULY → 27 JULY

27 JULY → 10 AUGUST

## Get Ready for Medicine

Becoming a medic is one of the most challenging but rewarding career paths. Our programme is tailor-made for aspiring medics. Engage in practical laboratory work, and explore infectious diseases, immunology, neuroscience and technology's role in medicine.

### THE COURSE INCLUDES:

- A whole-day clinical workshop with a doctor
- Clinical workshops and scenarios
- Biology and Chemistry practicals (including heart and lung dissections)
- Achieving Emergency First Aid qualification
- Exploring and understanding medical ethics
- Planning your Personal Statement and interview practice
- Looking at UCAT and BMAT
- Medical-related trips

### THE FINAL ASSESSMENT

You will carry out a research project on a topic that interests you, and at the end of the course, you will present this to a panel of experts and your peers.

## Get Ready for Engineering

As the global demand for skilled engineers skyrockets, we're here to equip you with core subject knowledge essential for a successful university engineering career. Our tutors will guide you through diverse engineering fields, helping you carve a clear path for the future.

- Build core subject knowledge and insight across multiple fields of engineering - civil, mechanical, electrical and chemical
- Study Maths and physics related to Engineering concepts, including algebra, integration and forces and motion, building a solid foundation in key subjects
- Learn to apply knowledge and skills through practical technology workshops
- Develop leadership, team building, presentation, public speaking through our Da Vinci Project competition
- Visit an innovative engineering company and learn about new technology
- Consider environmental and sustainability challenges, as well as ethical issues

**FINAL SHOWCASE:** Da Vinci Competition - this team challenge emphasises developing your higher-order thinking skills, problem-solving and creativity.

## Get Ready for Entrepreneurship

We aim to nurture future visionaries and equip them to thrive in a rapidly changing world. The focus will be on entrepreneurship and innovation within a business context. We will help you develop essential life skills and tools to be successful in your future. Our goal is to inspire the next generation of innovators, empowering you to believe in your potential to lead and shape change in the world.

- Learn about entrepreneurship, innovation and leadership in business
- Find out more about yourself and your role
- Develop your presentation skills, your personal brand and your thought leadership
- Learn how to manage a budget and your finances
- Understand Corporate social responsibility (CSR) and business ethics
- Look at branding, marketing and sales, including a visit to the Museum of the Brands
- Develop your understanding of competition and the importance of a SWOT
- Business planning and writing a business plan
- Visits to a company and industry-related trips
- Workshops and lectures with business experts

**ENTERPRISE CHALLENGE DRAGON'S DEN:** Develop a business plan to create a successful business and pitch it to a panel of experts.

## Get Ready for Robotics & Coding

New for 2025, in partnership with Tech Study UK and taught by Tech Study UK's CEO, Yonca Kurt, we are pleased to launch Get Ready for Robotics and Coding. In today's world, where information is just a click away, and AI is developing so fast, success is achieved through life experience, embracing challenges, dreaming big, and nurturing an unquenchable curiosity about technology.

This exciting robotics and coding camp is the gateway to turning curiosity and dreams into action. No prior technical knowledge is required – just bring your enthusiasm and get ready for an unforgettable learning adventure.

You will participate in various projects, from automating Bluetooth robotic cars to delving deep into programming and engineering using the Arduino microcontroller. Your learning will be filled with hands-on projects and meaningful accomplishments.

### WHAT YOU'LL LEARN AND CREATE

- **Master Arduino Basics:** Learn to code in C programming and explore foundational electronics.
- **Dive into Electronics:** Start with LED control and progress to more complex circuits.
- **Wireless Communication:** Work with Bluetooth modules to create interactive systems.
- **Innovate with Motors and Sensors:** Turn creative ideas into reality by integrating motors and sensors.
- **Enhance Your Coding Skills:** Use loops, conditionals, and problem-solving to build smarter systems.
- **Build a Robotic System:** Learn essential techniques to create your own robot from scratch.
- **Hands-On Experience:** Work with sensors, motors, and circuit components in real-world projects.
- **Unleash Creativity:** Design and build unique Arduino-based projects tailored to your imagination.
- **Project-Based Learning:** Enjoy a dynamic and interactive learning environment.

### THE GRAND CHALLENGE

Design, build, and program your very own **robot**, and proudly showcase it during our **Grand Finale Presentation!** Prepare to transform your ideas into action, explore the limitless potential of robotics, and ignite your passion for technology and innovation.

**TECHSTUDY**  
UK

## Family Programme

Our family programme is a flexible course for parents and children (10-17 years) who want to visit London together and combine quality language learning with the option for their children to take part in our Academic Summer School programmes.

Parents join our adult General English morning classes while their children study in separate classes with our partner Academic Summer Camps. In the afternoon parents can choose to participate in our varied social programme for adults whilst their children take part in our fun and educational excursions and workshops with their classmates on the Summer Camp programme. On these trips both parents and children can practise their English skills and also see many of London's famous sights.

Classes start in the morning and finish at lunchtime, leaving the afternoons to enjoy London. Students will get 15 hours of lesson time per week. Regular homework and in class tests will be given. Discounts are available after three weeks' of lessons.

Maximum class size is 15.

### FEES

1-3 Weeks £260

4-6 Weeks £245

This course is only available to Day Students only.

# Accommodation

Enjoy the modern, state-of-the-art accommodation and be reminded of the city's history with parts of the Roman Wall of London running through the basement—an awe-inspiring reminder of the city's rich past.

Our first-class facilities enrich your learning experience. The college underwent a multi-million-pound refurbishment in 2017, boasting over 60 classrooms with interactive whiteboards, state-of-art Science Labs, a modern Lecture Theatre, an inviting Auditorium, Art Studios, Dance Studios and a canteen where you can indulge in a diverse menu of nutritious meals.

### CHOOSE FROM TWO ROOM OPTIONS:

**Single standard room:** Secure, lockable single bedrooms in two to three-bedroomed flats. Each flat shares a shower room and kitchen with one or two other students. The bedroom includes a desk, a comfortable double bed, a wardrobe and underfloor heating.

**Ensuite rooms:** Each lockable bedroom features a desk, a small double bed, ample storage and underfloor heating, and the room has its own shower room.

## Leisure Programme

Experience an unforgettable summer filled with excitement, learning and adventure we have the location, so let's make the most of it! The leisure programme is designed not only to enhance your academic skills and prepare you for the future but also to offer you the opportunity to make new friends, boost your confidence and have a blast exploring this vibrant city in the afternoon and evening.

Imagine... immersing yourself in the City of London's rich history and culture, surrounded by iconic landmarks and cultural hotspots. From exploring historic sites such as the Tower of London to delving into contemporary wonders in the City, this camp promises a thrilling journey of discovery.

We're dedicated to making your summer truly extraordinary. Our leisure programme is brimming with unique and exhilarating trips that will take you on adventures both within London and beyond. At the weekend, you'll have the chance to see more of England and soak in its unique charm during our weekend trips to Oxford, Windsor, Brighton, and Cambridge.

Activities are subject to change, please discuss with the team for the latest programme information.

Prepare to be amazed by the perfect blend of fun, education and adventure.
